

Mutual Fund Performance Scenarios (Article 8 of Regulations (EU) 1286/2014, 2017/653 and 2021/2268)

Your return from each product depends on future market performance. Market developments are uncertain and cannot be accurately predicted. The performance scenarios have been produced assuming the maximum possible total cost of the products. Actual charges may be lower than those used as assumptions. The data do not take into account your personal tax status, which can also affect the amount you will get. The unfavourable, moderate and favourable scenarios presented are examples where the worst, average and best performance of products over the last 10 years is used and for periods when products do not have sufficient historical data, data from their benchmark or a representative index is used where the product does not use a benchmark. Markets could perform very differently in the future. The "Stress" scenario illustrates what you could get from each product in extreme market conditions.
